Profile

Software Engineering student at COMSATS University Islamabad with hands-on experience in frontend web development using React, Next.js, JavaScript, and Tailwind CSS. Passionate about building responsive and interactive user interfaces with modern web technologies. Developed multiple web-based projects including food ordering systems and interactive design platforms.

Education

BS Software Engineering, COMSATS University Islamabad, Islamabad
FEB 2023 – FEB 2027

Projects

Interactify - Design Editor

React.js | Next.js | Tailwind CSS | Fabric.js | MongoDB | Node.js

- Developing a modern web-based interactive design tool inspired by Canva using React and Next.js.
- Built drag-and-drop style interactive UI components with dynamic content updates.
- Implemented responsive layouts and reusable frontend components using Tailwind CSS.
- Added QR-code integration for accessing live interactive content through mobile devices.

Spotify Clone – Web Music Player (Featured Project)

HTML | CSS | JavaScript

- Developed a fully functional Spotify-inspired web music player using vanilla JavaScript.
- Implemented dynamic data loading from structured local files (separate artist/album folders).
- On album selection, fetched and displayed the relevant song list dynamically.
- Built complete audio playback features: play/pause, next/previous track, and interactive seek bar.
- Structured code by separating data handling, UI rendering, and logic, following MVC-style principles.
- Focused on clean DOM manipulation, application state management, and user interaction.

X (twitter) UI Clone (Design-Focused)

HTML | Tailwind CSS

- Created a responsive X(twitter)-style landing page
- Demonstrated strong Tailwind CSS utility-based styling
- UI/UX and layout focused project (design only)

Food Delivery Website

HTML | CSS | JavaScript

- Built a responsive food ordering website with menu browsing and order actions.
- Implemented interactive UI behaviors with clean DOM manipulation.
- Designed frontend structure to integrate with RESTful backend services (future-ready).
